SEP 20 2000
TC 2700 MAIL ROOM

Q1
1. (Once amended) A communication device comprising:
a housing;
telecommunications circuitry located in a wall of the housing;
a source of illumination located within the housing and positioned to project a
beam of light through the lens to illuminate an area surrounding the device with sufficient
candlepower to enable a user to view the area; and
a power source for the source of illumination in electrical communication with the
source of illumination.

8. (Once amended) A power source unit comprising;
